Suppliers to the large format print trade

Spring/Summer 2011
DPS Brochure

Welcome and Contents

DPS are the one stop source for all your photographic and large format print requirements - from computer hardware and software through to large format printers, RIP software, inks, media, laminators, frames and all other print & office supplies.

In this brochure, you'll find details of our key products for the photo and print trade. We are always looking to bring the latest products to market and you will see many new, innovative products to help maximize your profits and differentiate yourself from the competition. To further help your growth in these tough times, we are especially pleased to launch the DPS Select Club to help drive down costs for our most loyal customers. See back page for details.

We look forward to hearing from you,

The DPS Team

For the full list of qualifying Epson printers please visit www.epson.co.uk/loyalty

†Terms and conditions

Offer available for purchases made from 1st January 2011 to the 31st March 2011 inclusive. This offer is only valid for purchases of the Epson Stylus Pro printers listed in the table above. To qualify for the loyalty discount, customers must own a qualifying Epson Stylus printer. A full list of qualifying printers can be found at www.epson.co.uk/loyalty. Each qualifying Epson printer can only be used for one loyalty discount. Stock subject to availability. Your retailer is responsible for ensuring the relevant loyalty discount is subject to receiving your proof of ownership of a qualifying existing Epson printer. This promotion cannot be claimed in conjunction with any other Epson offer on these models, except the half price three-year on-site CoverPlus Extended Warranty offer. Purchases of the Epson Stylus Pro 4900S, 7890S, 7900S, 9890S and 9900S will also receive the free Mirage Pro Software.

Terms and Conditions

Offer available for purchases made from the 1st October 2010 to the 31st March 2011 inclusive. The half price three-year on-site CoverPlus Extended Warranty offer upgrades the standard one-year warranty to a three-year on-site CoverPlus Extended Warranty. The offer is effective from the date of purchase of the relevant Epson Stylus Pro printer listed in the table. This offer is available within the mainland UK or the Republic of Ireland, islands having a direct road connection to them or the Isle of Wight. Warranty terms and conditions apply at www.epson.co.uk/services

Call: 020 8466 7230

Use genuine Epson inks & save money with DPS

The most cost-effective way to run your Epson large format printer and to ensure long-term colour consistency is to use genuine manufacturer's inks for the life of machine. All of the Epson printers we supply come with a set of inks to get you started. For your ongoing requirements, we supply Epson's own, easy to install high capacity inks in cartridge form at very competitive prices.

Real-time indicators on the printer display panel shows how much of each ink colour has been used and you can change or "hot-swap" single inks at any time as opposed to having to change all the ink colours in one go which can mount up to 11 inks.

Our chart below shows you our pricing structure for genuine Epson inks, which reflect a 15% discount off RRP's. Call us for quantity prices which are based on "mix and match" purchases per order (not per colour), making it even easier for you to save more without stocking colours you don't need straightaway.

If you are a regular buyer of Epson inks, why not apply to become a DPS Select Club member? (see outside back cover for more details).

Epson Professional Inkjet Media

The fine art paper range which delivers the closest result to an original piece of art

**DIGI
GRAPHIE[®]**
by **Epson**

Recognising that artists & professional photographers require a variety of media to produce or archive their work, Epson have introduced four new fine art papers. Approved for Epson's Digigraphie programme, the new papers: Hot Press Bright, Hot Press Natural, Cold Press Bright and Cold Press Natural are optimised for use with Epson UltraChrome ink technology and now come in roll format as well as cutsheet packs.

Frans Craandijk, Senior Product Manager, Epson Europe, said:

"We've had some of the world's most demanding photographers testing this outstanding new range in combination with Epson professional printers, and they are telling us that the results achieved are the closest thing yet to original pieces of art."

These Digigraphie-certified photo and museum grade papers are inspired by the craftsmanship of artisans who developed the world's first watercolour papers, and they are pressed using traditional 'mould-made' methods. This enables artists to achieve a highly original look and feel with richer blacks, smoother tonal transitions and an expanded colour gamut.

"Put simply, when used with Epson inks and printers, this new paper range can produce the expert, authentic-quality expected in the fine art market."

The four new 100% cotton papers are PH buffered and free from linen and acid, with a specially developed coating to give an exceptionally wide colour gamut and high D-Max.

Other Professional Inkjet Media

In addition to being a leading supplier of Epson cut sheet paper and rolls for large format inkjet printers, DPS also stock a wide range of media from industry-renowned brands such as Hahnemühle, Innova, Somerset, Bockingford and Canson.

Hahnemühle FineArt has developed a comprehensive range of papers for professional artists for over 420 years. These popular papers provide an impressive and unique way to combine the precision of digital print media with the wonderful grace of genuine artist papers made in a traditional way.

Canson® is a worldwide leader in Fine Art paper making and manufacturing since 1557. Canson Infinity is the brand name given to the new Digital Fine Art & Photo range crafted in the Canson and Arches mills. Canson Infinity offers you Museum Quality Fine Art & Photo Inkjet Papers and Canvas.

Innova Art is a specialist supplier of high quality Photographic and Fine Art substrates for giclée and inkjet printing. The award winning Innova Art FibaPrint range has been designed as a digital solution to the traditional Fibre based baryta papers used in the conventional darkroom.

Somerset Enhanced is an exquisite fine art inkjet paper perfect for high quality professional photography and fine art reproduction. The paper has a beautiful surface texture and a fine art heritage. Crisp and vibrant images are achievable, whilst still retaining the subtleties and beauty of an authentic artist paper. The surface of the paper becomes part of the finished print, without overwhelming the image, but adding a fine art element to the composition.

Somerset Photo is designed for use in the photographic and fine art markets and is capable of producing a wide colour gamut and achieving high colour density values (d-max) on pigment inkjet printers. It is made from 100% cotton linters on a traditional Mould Machine, using woollen felts to impart a delicate texture to the surface of the sheet. The resultant sheet has a high whiteness value, without resorting to excessive use of optical brightening agents.

Bockingford Inkjet is an attractive textured paper specially made for artists who wish to produce prints with the look and feel of their original watercolour painting. The unique Bockingford watercolour paper has been given an ink receptive coating on both sides, which allows the creation of limited edition books, portfolios and greetings cards. The coating is resistant to damage, making it more durable than other fine art inkjet papers.

DPS Everyday Media

An everyday media range that won't break the bank

We recognise that occasionally a more cost effective media is needed for certain jobs or clients. That's why we have launched our own

range of large format roll and cut sheet media called DPS Everyday. With no compromise on quality, the cost effective DPS Everyday range meets the needs of many of our customers who happily use our media alongside leading branded products.

The entire DPS Everyday media range is inkjet friendly and covers a wide array of applications from general posters & point of sale to photo quality printing and giclee canvas printing.

Below are some of our more popular lines – please contact DPS for pricing on any other specific media requirements.

Phototex Digital Wallpaper

The original and best

Phototex digital wallpaper is a revolutionary paste free/self-adhesive fabric based ink jet media that is used in place of wallpaper for indoor and outdoor applications. Its unique paste free adhesive means it can be placed on any (non-porous) flat surface. Available in aqueous and eco/solvent rolls in a range of widths.

Phototex Benefits

- Polyester blend fabric for strength and easy hanging.
- Cross compatibility with most printing technologies.
- Low tack self-adhesive that is removable, repositionable and reusable, also totally paste free.
- Waterproof and suitable for humid/outdoor applications
- Incredibly durable – will not rip or wrinkle.
- Suitable for kiss/die cutting (use carbide knife) and liquid or spray protection/lamination.
- Can be back-lit with stunning results

Printing Phototex

- Compatible with Pigmented, water based, solvent, eco solvent and UV inks.
- Specialised coating to produce high vibrancy when printed.
- Fine texture delivers high quality images.
- Ink dries immediately with correct ink settings optimised according to software instructions.

Mounting Phototex

- Easily applied and easily removed without leaving any residue.
- Can be removed and re-positioned
- Will stick to any non-porous surface, walls, windows, doors and floors.
- Will not damage host surface.
- Low tack self-adhesive. Totally paste free.

Protecting Phototex

Phototex can be used for many applications without further protection, but for extra physical protection and UV protection Clearshield Liquid Laminates are ideally suited. The Clearshield Liquid Lamination range has been developed specifically for different applications, be it digital wall paper, canvas, fleet graphics or similar. Contact DPS for more details on how you can protect your output.

JetMaster Display System

The cost effective solution for display and gallery wraps.

Whether you're creating prints for an exhibition or for a more permanent display, a simple, reliable and low-cost solution is the best option. The JetMaster Display System for photo, fine-art papers and canvas is the ideal gallery wrap system.

With JetMaster, durable, lightweight gallery wraps can be created in minutes, using just a craft knife and a cutting surface. The base is pre-cut, pre-laminated corrugated board to which you simply trim and adhere your print, and fold over the edges. No bubbles, untidy corners, staples or hooks. A fully assembled JetMaster 'gallery wrap' is so light it can be hung from just one tack.

JetMaster provides a display system that matches digital printing for quality and flexibility. It provides a premium display option that is simple, effective and low cost.

With JetMaster the days of outsourcing the stretching and fixing of canvasses for gallery wrap presentation are over. The benefits to you are speed, lower cost and the ability to offer your customer genuine one-stop solutions. Take control with JetMaster.

Available now in the following sizes:

• A4 • 12" x 16" • 16" x 20"
