

THE MAGNIFICENT 8 FEATURES OF THE imagePROGRAF TC-20M

Canon

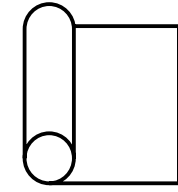

YOUR PERFECT PRINTER WILL:

SCAN, COPY, REPEAT AND ENLARGE...

1

SCAN AND PRINT EASILY WITH ROLL PAPER AND CUT SHEET

5

1. VERSATILE FUNCTIONALITY

Your opportunities are limitless with the TC-20M. Use its market-first A4 flatbed scanner to create a range of output: prints from hand sketches, enlarged marketing materials, personalised wrapping paper and much more. Versatile large format printing is made even more flexible with the ability to use cut sheets or roll paper, for truly customisable sizing.

2. HIGH QUALITY, AFFORDABLE PRICE

All the power of high-quality pigment ink prints, without the price tag. The imagePROGRAF TC-20M accurately reproduces everything from technical drawings to marketing materials, for professional results you can rely on. With an embedded A4 flatbed scanner, you don't need multiple devices to achieve the same output. Bring your vision to life with vivid colour expression and sharp, crisp lines, which aren't impacted by bad weather.

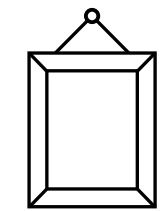

3. SEAMLESS SCANNING

The TC-20M's A4 flatbed scanner is the first of its kind, also allowing direct scan and print using its built-in USB port*. Enlarge small prints and digital files to create professional quality prints up to A1 or copy, duplicate and manipulate scanned images to create bespoke wrapping paper in seconds.

*Supports PDF and JPEG
PDF: Only files generated by imagePROGRAF TC-20M and Canon IJ Scan Utility software
JPEG: Exif ver2.2/2.21/2.3

4. COMPACT DESIGN

Can you imagine a professional large format printer tucked onto a shelf or desktop? You can now. The imagePROGRAF TC-20M is compact, bringing key functionality from larger devices into smaller spaces - in the office or at home. Now you really can do more with less.

PRINT IN EXCELLENT QUALITY

ALLOW SEAMLESS HYBRID WORKING

6

5. SMOOTH WORKFLOW

Complex output, hassle-free input. The TC-20M's scanning function is intuitive, so you can produce large format prints quickly. Full front access means easy ink refills and no awkward, time-consuming maintenance. The shaftless roll holder makes setting up roll paper straightforward in the smallest spaces, while the built-in auto-sheet feeder minimises intervention when switching between roll paper and cut sheet.

6. HYBRID READY

Home, office, building site, retail shop - all in a day's work with the imagePROGRAF TC-20M. It shares the same job submission tool as your office-based imagePROGRAF devices, including Direct Print Plus and Free Layout Plus, for seamless hybrid working.

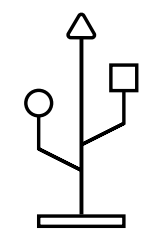

7. GREEN AT HEART

Wherever you are in your sustainability journey, the imagePROGRAF TC-20M can help you meet your goals. Easily recyclable plastic ink bottles and streamlined packaging help you reduce waste and target lifetime carbon emissions. Low power consumption during operation and standby mode makes the TC-20M the first Canon large format printer to attain an EPEAT Gold* rating.

*EPEAT Gold registered in the U.S.

8. BIGGER INK BOTTLES WITH LOW TCO

High capacity 70ml ink bottles with low total cost of ownership (TCO). The imagePROGRAF TC-20M uses a specialised tubing system to supply ink to the print head, allowing for bigger ink bottles. That means less frequent refills, lower operating costs, and more time spent printing.

ALLOW DIRECT SCAN AND PRINT
